DEPARTMENT TECHNICAL SUPPORT

REGISTERED ADDRESS 1191 PABLO OCAMPO SR. EXT, MAKATI CITY, METRO MANILA

NAME OF SUPERVISOR MARION S. CACANINDIN

JOB POSITION SITE HEAD

TITLE OF PROJECT WEB-BASED INVENTORY SYSTEM

BRIEF DESCRIPTION OF PROJECT

This is a web-based inventory system which tracks the status of PCs within a laboratory room. The system allows the users to report defective hardware (i.e. issues with monitor, keyboard, etc.). These reports will be displayed on a table containing the terminal number, the specific issue, and the person who reported the issue. Upon resolution of an issue, the table will be updated, including the name of the person who resolved the defect.

The system includes a dashboard which contains the overview of the status of the PCs within the room. It displays the number of working and defective PCs in the room, how many PCs have been checked for that day, and etc.

The system will output a printable copy of the list of reports made for the laboratory room.

I, hereby, certify that the above project and description shall be the major work to be undertaken during the OJT program. The trainee's supervisor has requested this project which will be useful in the organization and have a direct impact in the company.
